Objective: Passionate developer with almost a decade experience programming in G-code. Seeking an opportunity to apply my dedication and passion for a software development company.

Skills

- HTML | CSS | JavaScript | React | Node.js | Express | MongoDB | GIT -

---

Projects: Live demos and source code at TKDevDesign

Parent Helper
Register, login, and access your data. A daily journal to record multiple aspects of your child's life. Calculate nap lengths, track foods, take notes, and even record poops!

Weather App
Displays API data pulled from WeatherAPI. Input a location or use your devices GPS to locate you. Save your location for next time you visit.

Quit smoking savings calculator
Watch your progress increase as each day passes. Register to save your data and create custom goals. Collect completed goals to motivate you further.

TKDevDesign.com
Responsive portfolio to introduce myself and showcase my work. Built with HTML, CSS, and JavaScript. Node.js / Express handles serving my resume and emailing form data.

Experience:

Digital Machine Company: Aug 2012 — Feb 2021

CNC Programmer / CNC Set-up

- Create G-code programs from blueprints to manufacture precision parts.
- Trouble shoot programming issues for my department team.
- Choose best tooling and machining practices to efficiently complete a job.
- Alter programs and tool geometry to accommodate for tool wear.
